SUMMARY

Full Stack Developer | Web Apps | Django | Next.js I just recently built a travel booking platform from scratch. I did everything from the TypeScript frontend to the REST API backend. Hands-on experience with JWT authentication, Docker containerization and Nginx configuration. eager to contribute and keep learning as a Junior Developer

EXPERIENCE

Full Stack Developer | Travel-Booking System(Senior Project) **August 2025 - November2025**

- Frontend: Developed responsive UI using Next.js 15, TypeScript and Tailwind CSS 4. Added React-hot-toast for notification and fontawesome for clean UI/UX.
- Backend: Built a REST-ful API using Django REST Framework. Implemented JWT (SimpleJWT) for secure user authentication and login.
- Infrastructure: dockerized the whole application with Docker and Docker Compose. Set up Nginx as a reverse proxy to manage web traffic and serve the application.
- Database: Design and maintain database schema with PostgreSQL (Production) and SQLite (Development)

My-Web-Portfolio (Personal Project) **August 2023 - April2025**

- Frontend: Designed and developed a fully responsive portfolio website featuring a modern glassmorphism UI. Utilized semantic HTML5, advanced CSS3 (Grid/Flexbox, Animations), and Vanilla JavaScript for interactive scroll-based reveals.
- Version Control: Managed source code and tracked project history effectively using Git and GitHub.

Full Stack Developer | Manga Reader Platform (Personal Project) **November 2025 – Present**

- Frontend: Created a responsive web interface using Next.js 16, React 19 and TypeScript. Styled UI/UX using Tailwind CSS 4 and Lucide React.
- Backend: Created a robust RESTful API using Django REST Framework. Used JWT for secure authentication and Cloudinary for scalable cloud storage of media files.
- Database & Infrastructure: Managed MySQL database using Docker and Django ORM. I have dockerized the entire environment with docker-compose to ensure consistent deployment workflows.
- Deployment: Setup Gunicorn and WhiteNoise for production, deployed backend on Render and frontend on Vercel.

EDUCATION

Bachelor of Science in Computer Science **2021 - 2025**

Bangkok University (Information Technology and Innovation)

- Major Computer Science .
- GPA : 2.91

LANGUAGES

Thai : Native

English: Intermediate

TECHNICAL SKILLS

Programming Languages

- TypeScript, JavaScript, Python, HTML5, CSS3

Frameworks & Libraries

- Next.js, React, Django REST Framework, NestJS, Tailwind CSS

Databases & ORM

- PostgreSQL, SQLite, Prisma, Supabase

Infrastructure & Tools

- Docker, Docker Compose, Nginx, Git, GitHub, CI/CD Pipelines

SOFT SKILLS

- Problem-Solving & Analytical Thinking
- Self-Motivated & Continuous Learning
- Attention to Detail & Responsibility
- Time Management & Team Collaboration
